DRAFT

1.5 meters / 5 feet

ENGINES

2 Caterpillar

Tier 3 Emission compliant

CRUISING SPEED

10 knots

GENERATORS

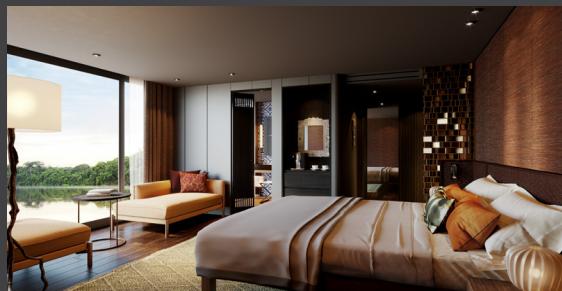

2 Caterpillar,

encapsulated for noise reduction

WATER TREATMENT

Reverse osmosis and UV water treatment plant

Peru offers explorers the most direct and accessible path to the heart of the Amazon. Iquitos in Northeastern Peru, where the Aqua Nera sets sail, is just a two-hour flight from the capital and international air hub of Lima and the archeological treasure trove of Cusco. Surrounding Iquitos is lush Amazon territory — a region comprising the head of the Amazon River and the Pacaya-Samiria National Reserve. Here the upriver Amazon waters are low in sediment and rich in aquatic life, with an astonishing concentration of wildlife on land.
